Please see below my email to Sir Charles Walker, UK Tory MP, requesting his assistance to discover who initiated the plan to vaccinate the entire global population against SARS-CoV-2/covid-19, as it appears the UK Johnson Government has been instrumental in this global vaccination response against a virus which isn't a serious threat to most people.

Subject: Who initiated the plan to vaccinate the entire global population against SARS-CoV-2/covid-19?

To: <charles.walker.mp@parliament.uk>

Cc: <swayned@parliament.uk>, <altsale@parliament.uk>, <steve.baker.mp@parliament.uk>, <mark.harper.mp@parliament.uk>, <lockdownsceptics>, <irreverendpod>, <conservativewoman>, Emma McArthur

### For the attention of:

Sir Charles Walker  
Conservative MP for Broxbourne  
Joint Vice-Chair 1922 Committee

Dear Sir Charles

Further to Emma McArthur's email addressed to you and your parliamentary colleagues and others, subsequently published as an article on *The Conservative Woman* titled: **Why discard the pandemic plan in favour of a senseless lockdown?**

In her email, Emma McArthur notes "**A recent estimate of the global infection rate for COVID-19 is 0.15%, which is not dissimilar to influenza. Yet, the British Government, along with the rest of the world, continues to respond to this respiratory virus as if it is Ebola, taking away fundamental human rights in the process**". She also notes "**The British Government itself stated on 19 March 2020 that COVID-19 was not a high consequence infectious disease...**"

Sir Charles, the UK-led response to SARS-CoV-2/covid-19 has had a massive impact around the world, **particularly the influence of the modelling by Neil Ferguson et al, Imperial College London**, see for example their **Report 9**, dated 16 March 2020, which recommends a 'suppression' strategy which "**will need to be maintained until a vaccine becomes available (potentially 18 months or more)**..."

Sir Charles, **can you please help me discover who decided on a global vaccination response to the SARS-CoV-2 virus, i.e.**

- **Who initiated the plan to vaccinate the entire global population against a virus which it was already known wasn't a serious threat to most people?**
- **How was this plan evaluated and by whom?**
- **Where is the public record?**

These are questions I have asked recently of Professor Andrew Pollard, who is both the Chief Investigator on the Oxford/AstraZeneca vaccine trials, and the Chair of the UK Joint Committee on Vaccination and Immunisation...**a stunning conflict of interest!**

**Please see below my email thread to Professor Pollard**, in which I also question why children were included in the Oxford/AstraZeneca vaccine trials when it was known from the beginning that children, and most others, weren't at serious risk with the SARS-CoV-2 virus.

Sir Charles, can you please help me obtain answers to my questions, which are relevant for the entire world?

The grossly disproportionate and ill-targeted global response to SARS-CoV-2, which has been very much influenced by the UK Johnson Government and SAGE, has had a disastrous impact on global society and the global economy.

It's time for independent and objective retrospective critical analysis of the astonishing events of the past 18 months - how has this happened?!

The enactment of 'emergency laws' in the UK and around the world has swept away our rights, it's been shocking to discover there are no checks and balances to protect us from this abuse of power in our so-called 'liberal democracies'.

Who can we rely upon to investigate this matter, certainly the 'fourth estate', the mainstream media, particularly the licence payer-funded BBC, has been a devastating failure in shining a light on this destructive affair, and indeed has acted largely as a propaganda arm for the Johnson Government. With a non-existent Opposition (Labour party) in the UK, and a compliant fear-mongering media, the Johnson Government has not been held to account. This is a similar experience around the world, including in Australia where I live. We are living in an Orwellian situation, facing a future of surveillance, control, and lockdowns, and coercive isolation, testing, masking and vaccination. Our political systems are broken and not working for the people, something is seriously wrong.

Sir Charles, please carefully consider my email to you, and my emails to Professor Pollard, see email thread below.

**I request your assistance in obtaining transparency and accountability. Members of the UK Parliament have an ethical duty to challenge the leaders of the arguably rogue Johnson Government, and act to address this catastrophe which continues to reverberate around the world.**

Sincerely

Elizabeth Hart

Subject: Why were children included in the covid-19 Oxford/AstraZeneca vaccine trials?

To: Andrew Pollard

Cc: Sharon Davies, Peter Doshi, Kamran Abbasi, Theodora Bloom, Allyson Pollock, John Ioannidis, Simon Wain-Hobson, Richard Ebright, Marc Lipsitch, Mike Osterholm, Tom Inglesby, Carl Heneghan, Michael Levitt, Martin Kulldorff, Jayanta Bhattacharya, Sucharit Bhakdi, Gus Dalglish, Karol Sikora, Anders Tegnell, Johan Giesecke, Ian Frazer, Peter Doherty, Peter Collignon, Roy Anderson, Peter Openshaw, Adrian Smith, David Cannadine, Venki Ramakrishnan, Andrew Goddard, Chris Conlon, Dan Summers, John Shine, Robert Clancy, Sunetra Gupta, Heidi Larson, Graham Medley, Melinda Mills, John Bell, David Kennedy, Andrew Read, Neil Ferguson, Patrick Vallance, Chris Whitty, Peter McCullough, Nick Hudson, Fiona Godlee

**For the attention of:**

Professor Andrew Pollard

Chief Investigator on the Oxford/AstraZeneca vaccine trials

Chair of the UK Joint Committee on Vaccination and Immunisation

Dear Professor Pollard

**Why were children included in the Oxford/AstraZeneca covid-19 vaccine trials?**

It was reported in May 2020 that "**most paediatric cases with laboratory-confirmed SARS-CoV-2 infection are mild; severe COVID-19 disease in children is rare**". \*

**It was known from the beginning that children weren't at serious risk with the SARS-CoV-2 virus, why were they included in covid-19 vaccine trials?**

**To vaccinate people at an early age with what potentially could be annual coronavirus vaccination throughout life, with unknown long-term cumulative consequences, raises important ethical questions, particularly when they are not at serious risk of disease.**

Professor Pollard, I first asked you about this last year, in an email dated 20 June 2020, see email below. **But you did not respond.**

I also asked this question in my *BMJ* rapid response: **Is it ethical to include children in the Oxford-AstraZeneca vaccine trials?** 5 February 2021.

Professor Pollard, the Helsinki Declaration states: **"Medical research involving human subjects may only be conducted if the importance of the objective outweighs the risks and burdens to the research subjects."**

As children do not appear to be at serious risk with SARS-CoV-2, in my opinion the risks and burdens for them participating in covid-19 vaccine trials outweigh the importance of the objective of the medical research, particularly as the plan is for children in general society to be vaccinated, when this appears to not be appropriate.

**Why were any age groups not at serious risk of the SARS-CoV-2 virus included in the covid-19 vaccine trials?**

And, ***most importantly...***who initiated the plan to vaccinate the entire global population against a virus which it was already known wasn't a serious threat to most people?

**How was this plan evaluated and by whom?**

**Where is the public record?**

I request your urgent response Professor Pollard, these are important matters of public interest. See my previous email to you below.

Sincerely

Elizabeth Hart

Subject: Questioning the ethics of children's involvement in Oxford's COVID-19 vaccine trials

To: <[andrew.pollard@paediatrics.ox.ac.uk](mailto:andrew.pollard@paediatrics.ox.ac.uk)>

**For the attention of:**

Professor Andrew Pollard

Head of the Oxford Vaccine Group

Chair of the UK Joint Committee on Vaccination and Immunisation

Dear Professor Pollard, **is it ethical to include children in SARS-CoV-2/COVID 19 vaccine trials?**

The phase II part of the Oxford COVID-19 vaccine trial in human volunteers is planned to include children aged between 5-12 years: <http://www.ox.ac.uk/news/2020-05-22-oxford-covid-19-vaccine-begin-phase-iiii-human-trials>

It's been reported that **"most paediatric cases with laboratory-confirmed SARS-CoV-2 infection are mild; severe COVID-19 disease in children is rare"**. (See comment published in *The Lancet Child & Adolescent Health: The immune system of children: the key to understanding SARS-CoV-2 susceptibility?* [https://www.thelancet.com/journals/lanchi/article/PIIS2352-4642\(20\)30135-8/fulltext](https://www.thelancet.com/journals/lanchi/article/PIIS2352-4642(20)30135-8/fulltext) )

**How can it be ethical to include children in SARS-CoV-2/COVID 19 vaccine trials if most SARS-CoV-2 infections in children are mild, and severe COVID-19 disease in children is rare?**

**Professor Pollard, can you please advise what type of ethical committee process was undertaken in regards to Oxford's COVID-19 vaccine trial involving children aged between 5-12 years?**

I would appreciate your response on this matter.

Sincerely

Elizabeth Hart
