

Reckless and grossly irresponsible response to covid-19 - the UK in the thick of it

Please see below my email to Sir Patrick Vallance and Professor Chris Whitty, the UK's Chief Scientific Adviser, and Chief Medical Adviser, respectively, challenging them about the reckless and grossly irresponsible response to covid-19.

The UK's response to covid-19 has impacted all around the world, including with the rushed Oxford/AstraZeneca covid-19 'vaccine' rollout.

There's much more to emerge about the handling of this situation...

Elizabeth Hart

For the attention of:

Sir Patrick Vallance, UK Government Chief Scientific Adviser
Professor Chris Whitty, UK Chief Medical Adviser

Sir Patrick Vallance and Professor Whitty

It emerged in early 2020 that elderly people with comorbidities were at risk with the SARS-CoV-2 virus.

Independent and objective specialists in infectious diseases should have focussed on developing preventatives and treatments for the vulnerable, including easy and inexpensive promising preventatives such as vitamin D for those with a deficiency.

Instead, people associated with the pharmaceutical industry oversaw billions of pounds being poured into researching vaccine candidates, and PCR testing, and contact tracing, while sick people died from lack of treatment and neglect.

Now billions of people around the world not at risk of covid-19 are being coerced to sacrifice their own natural immune response to the SARS-CoV-2 virus, and submit to lucrative 'leaky vaccines' that don't prevent infection or transmission - to purportedly protect against a disease which doesn't pose a serious risk for most people.

What lies ahead for these vaccinated people...who aren't actually *immunised*, and who may now be pressed to **have a lifetime of covid injections, against a virus most could have dealt with naturally.**

How did this happen?!

What sort of independent and objective review and approval processes did the covid-19 response go through?

None by the looks of things!

What does the future hold now, after a variety of experimental covid-19 injections have been rushed to market, and pressed upon people of all ages and health status, already over 2 billion, and with more repeat 'boosters' in the pipeline? We have no idea of the long-term consequences of this unprecedented global mass 'vaccination' rollout, what will this unnatural intervention set in play? This is a massive experiment, being undertaken without 'informed consent'.

The SARS-CoV-2 virus is the excuse that has been used for a 'build back better' agenda to implement a universal vaccine, to be given repeatedly throughout life, along with other controls on the people.

More people need to see through the obfuscation and the fear-mongering, **to see what a massive scam has been pulled on the entire world, wreaking economic and social havoc.**

Billions and billions of pounds of the people's money has been wasted on 'leaky vaccines', useless testing, and dystopian electronic surveillance - the people's wealth transferred to the coffers of a few. This is theft on a colossal scale.

But even worse is the theft of people's liberty and autonomy, with the Boris Johnson Government and SAGE's determination to terrorise the people about covid-19, and make them submit to medical tyranny.

Sir Patrick Vallance and Professor Whitty, this is shaping up to be the biggest scandal of all time, **and the UK is right in the thick of it, with the reckless and grossly irresponsible global response to covid-19.**

See my previous email to you: **The reaction to SARS-CoV-2 virus is the most reckless and grossly irresponsible 'public health' response in history.** 6 April 2021

Sincerely

Elizabeth Hart
