Are elections legitimate, with voters who have been grossly misinformed about Covid-19?

Elizabeth Hart <elizmhart@gmail.com>

Tue, Mar 22, 2022 at 4:00 PM

We're in dire straits in Australia, with a grossly misinformed public soon facing a federal election to decide our government for the next three years, after the last two years of the Covid debacle.

How can people make an informed vote, when they're fed a diet of lies and fear mongering by the mainstream media? The incumbent government uses taxpayers' money, or should I say taxpayers' **debt**, to pay the mainstream media to be a propaganda machine, e.g. to promote the rollout of defective Covid-19 jabs and other impositions on our lives.

Please see below my email to Australian senator Alex Antic, raising this matter before the recently held South Australian election, and raising concerns going forward, including about conflicts of interest in vaccination policy.

Our 'liberal democracies' are in a very bad situation. They're basically a two party state, with little to choose between the two parties, which are run by puppet masters not working for our best interests.

We give away our vote in an instant, and are then effectively disenfranchised for the next three years with governments which refuse to be accountable, particularly under highly questionable 'emergency laws' activated in response to a manufactured crisis.

How do we fix this system?

Elizabeth Hart

For the attention of:

Alex Antic

Australian Senator

Liberal Party, South Australia

Alex, tomorrow South Australians head to the polls, severely ill-equipped to make a decision on their political future.

For the past two years, the electorate has been misled and lied to about Covid-19, with the Morrison and Marshall governments, and other state and territory governments, pumping out fear-mongering propaganda via the mainstream media, to back the grossly disproportionate and ill-targeted Covid-19 response, as I raised with you previously in my email: Covid-19 jab mandates, the media/propaganda, and elections... 8 March 2022.

People are compelled to vote, but most are not equipped to make an **informed** vote, **because they've been so grossly misinformed by the propaganda pouring forth from politicians and the mainstream media and others.** It's a dire situation, because so many of the candidates have betrayed the electorate with their complicity in the extraordinary controls which stole South Australians' free movement and association, and bodily autonomy and bodily integrity via Covid-19 jab mandates.

The South Australian election, and the upcoming federal election, are now shrouded in illegitimacy due to the gross abuse that has been heaped upon the electorate for the past two years. Rogue governments have used 'emergency laws' to disenfranchise the people, there is no accountability.

The Marshall government in South Australia has refused to provide proof of 'the emergency' which has been used to constrain South Australians for the past two years, with no satisfactory response forthcoming to my email to Steven Marshall, see: **Curtailing the free movement of South Australians - Questions for SA Premier Steven Marshall**, 20 July 2021. My email to Steven Marshall was in response to his government sending the entire state into lockdown, on the back of 14 active 'cases', causing chaos across the state, disruption everywhere, including delaying treatment and operations for people in hospitals, closure of schools, closure of construction sites, effectively bringing normal life to a standstill, impacting on livelihoods, and family and social interaction. It's incredible to think of the hysterical Covid-19 response by the Marshall government, and other governments around Australia.

Chief Public Health Officer Nicola Spurrier has personally urged South Australians to have the Covid-19 injections. In June 2021 I raised the subject of informed consent before vaccination with Nicola Spurrier in my email **Coercive covid-19 injections in Australia**, 4 June 2021. No notice was taken of my arguments, **and subsequently Covid-19 jab mandates were imposed in South Australia from November 2021**, i.e. No Jab, No Job for many people, signed off by police commissioner Grant Stevens, see for example: **Emergency Management (Healthcare Setting Workers Vaccination No 7) (COVID-19 Direction 22**, (copy attached). I also raised the principle of informed consent with Lesley Dwyer, Chief Executive Officer of the Central Adelaide Local Health Network, see my email **Is it ethical to insist on covid-19 injections for health staff?** 7 July 2021. But again my arguments were ignored.

South Australians are still compelled to wear masks inside public places. In January 2022 I asked police commissioner Grant Stevens to provide evidence to support this imposition, see my email **Covid-19 restrictions - masks**. I received the response **"...the State Coordinator acts on the best available advice from relevant experts, including the Chief Public Health Officer and her team at SA Health"**. In other words, no evidence was provided...

Alex, your recent media release **Covid Theatre Alert!** provides a link to the meagre 'evidence' backing the Marshall government's onerous restrictions imposed in response to Covid-19. Your initial analysis of this 'evidence' indicates there is **"Nothing to support the mandates, nothing to support the coercion, nothing to support the theatre of putting masks on as you walk to your seat and then take them off when you sit down. NOTHING"**.

What do we face if the Marshall government is returned tomorrow, given the arbitrary rules and blatant lack of accountability for the past two years? The situation could be even worse if Peter Malinauskas becomes premier, judging by the Labor tyrants dominating other states and territories, i.e. Daniel Andrews, Mark McGowan, Michael Gunner and Anastacia Palaszczuk, who have set in place discrimination and segregation against critical thinking people who have refused the defective Covid-19 jabs.

The grossly disproportionate and ill-targeted Covid-19 response, with its one-eyed focus on a mass population 'vaccine' solution, is a disaster...and things could get much worse if things go even further awry with the defective Covid-19 jabs. This is a massive experiment which is being conducted upon the world's people, without valid voluntary consent. **How did this happen? It's way past time to evaluate the situation.** In this regard, please see my recent email to senator Gerard Rennick: **Call for urgent examination of vaccination policy, including the Covid-19 jab rollout**, 15 March 2022.

My email to Gerard Rennick includes an alarming statement, i.e. **"We've shifted the human population...to dependency on vaccine-induced immunity...We're in a very fragile state now. We have developed a world that is dependent on vaccinations"**, made by Heidi Larson, Director of the Vaccine Confidence Project, during the WHO Global Vaccine Safety Summit in December 2019, **just as SARS-CoV-2 was appearing on the scene...** I transcribed Heidi Larson's plenary lecture given at this WHO summit, **please see copy attached**, including my highlighting. This transcript should be considered very carefully by people investigating vaccination policy. The Vaccine Confidence Project is all about promoting vaccine products...but people associated with this organisation are reluctant to disclose conflicts of interest. I discuss this in my rapid response published on *The BMJ (The British Medical Journal)*, see: **'Pharma-led chorus' dominates the public narrative on vaccination**, 6 February 2019.

We're facing an unprecedented plan to repeatedly inject the entire global population with defective Covid-19 jabs that don't prevent infection nor transmission...against a disease it was known from the beginning wasn't a serious threat for most people. This is on top of a burgeoning vaccination schedule which has been protected from scrutiny for years. It's way past time to shine the spotlight on taxpayer-funded vaccination policy, this area has been colonised by the vaccine industry and its associates in academia.

For example, consider the influence of the vaccine industry-funded Immunisation Coalition, which is funded by vaccine promoters Pfizer, moderna, CSL/Seqirus, GlaxoSmithKline, Sanofi, Bioclect, and MSD (aka Merck). Members of this vaccine promoting organisation, which is very influential over the medical profession, pop up regularly in the media touting their professional affiliations and promoting vaccine products, including Robert Booy, Raina MacIntyre, Paul Griffin, Margie Danchin, Mary-Louise McLaws, Katie Attwell etc, but they often seem reluctant to fully disclose their conflicts of interest, e.g. their membership of this vaccine industry-funded organisation.

Alex, we have to talk about this now, about the increasing 'vaccine load' that's being imposed from cradle to grave - this subject must be on the table before the federal election which is likely to be held in May 2022, including examination of Scott Morrison, the Murdoch media/News Corp Australia, and No Jab, No Pay/No Play.

I request your acknowledgement of this email and your response on this matter.

Kind regards
Elizabeth Hart
