For the attention of:

Peter Malinauskas
Leader of the SA Labor Party
Premier of South Australia

Peter Malinauskas, an article on *The Advertiser* yesterday is dramatically headlined: **Seven Covid patients dead, 254 in hospital as SA records 3463 new cases.** (See copy attached.)

According to the **SA Health Covid-19 Dashboard as at 26 April 2022**, 332 deaths have been attributed to Covid-19. No start date for data is provided. Presumably this figure of 332 deaths is for the at least past two years? According to **ABS statistics released 29/09/2021, 27,524 deaths were registered in South Australia during the two year period 2019/2020**, i.e. 13,917 in 2019, and 13,607 in 2020. So it's likely a similar figure will result for say the period 2020/2021? It's remarkable that the small number of deaths attributed to Covid in generally elderly people excite so much daily attention, while thousands of other deaths from disease pass without comment in *The Advertiser's* headlines.

Are the Malinauskas government and *The Advertiser* collaborating to continue beating up the fear of Covid, and promoting Covid jabs with the daily stream of Covid articles? Also see my emails to you: **Deaths re Covid and Covid jabs, including Covid jabs for kids**, 11 April 2022; and **Peter Malinauskas bullying South Australians to submit to Covid-19 'leaky vaccines'**, 6 April 2022.

Upon reading the recent *Advertiser* article it emerges **"Seven people who tested positive for Covid, have died - one woman in her 70s, one woman in her 80s, two women in their 90s, one man in his 70s and two men in their 80s"**.

I submitted a comment on *The Advertiser* article, questioning: **"Did any of these people die 'of' Covid? Were they in hospital because of Covid? Or were they in hospital with other ailments? Did they have comorbidities? Have these people had any Covid jabs?"**

My perfectly reasonable questions were 'rejected' by *The Advertiser*. My undoubtedly frank questions are often censored on *The Advertiser*, see list of recently submitted comments attached.

This is very concerning Peter Malinauskas, **as there is no effective public forum for people to ask questions and seek accountability for public health policy.** My family pays hundreds of dollars a year to access Murdoch publications, i.e. tabloids such as *The Advertiser*, and *The Australian*, but often my comments on articles relevant to taxpayer-funded vaccination policy are censored. I pay to follow these publications, not because I find them a valuable source of news, **but rather to monitor media which is being used to manipulate public opinion and taxpayer-funded vaccination policy, e.g. fear mongering about Covid and associated misinformation/propaganda.**

As I've repeatedly raised in previous emails, **the Murdoch media, aka News Corp Australia, is highly conflicted in that it's associated with the Murdoch Children's Research Institute, which is involved in vaccine research, including Covid-19 vaccine research with the Doherty Institute.** The Murdoch media has also campaigned for coercive vaccination laws for children, i.e. No Jab, No Play/No Pay, **a precedent that is now being used to coerce adults to submit to defective Covid-19 'leaky vaccines', e.g. No Jab, No Job under state government mandates.** See my emails to prime minister Scott Morrison for more background: **Scott Morrison "a hypocrite and**

a liar" - informed consent and the Covid-19 jab rollout, 10 February 2022; and **No Jab, No Pay/No Play - coercive coronavirus vaccination in Australia**, 18 February 2021.

Has the Murdoch media's conflict of interest ever been properly disclosed on articles relevant to Covid-19 policy published by News Corp Australia? Not that I'm aware of...

Again Peter Malinauskas, **it's very concerning that corporate media such as News Corp Australia is apparently shaping the Covid-19 narrative in a way which may favour its corporate interests, e.g. vaccination research, including censoring subscribers' comments which challenge their preferred narrative. Is News Corp Australia collaborating with the federal and state governments in this regard?** It would be interesting to see a review of News Corp Australia publications over the past two years, and consider the bias and lack of disclosure of conflicts of interest. Perhaps it might be considered in a public inquiry about the grossly disproportionate and ill-targeted Covid-19 response in future?

Sincerely

Elizabeth Hart

Independent researcher investigating the gross over-use of vaccine products and conflicts of interest in vaccination policy
